

Heater IND 320

Portable induction heater

GRUETZNER
MAINTENANCE EQUIPMENT

Advantages

Portable, compact and lightweight

Simple operation

No support yokes required, just place workpieces on top

Flexibility

Different power levels
Can be used with all ring-shaped ferrous metal parts

Work safety

Automatic temperature monitoring, acoustic warning

Further advantages

- Clear control panel, quiet operation
- Clean and efficient
- 2 versions available: 230 V and 110 V

Perfect mounting...

...instead of premature bearing failure!

One in six bearing failures is caused by incorrect mounting.

The solution: **Induction heating**

The high-temperature-resistant design heats the inner and outer ring absolutely evenly. This prevents dangerous tensions in the material.

Your benefit: Completely effortless, clean and tilt-free installation – as gentle as possible on the material, your budget and the environment.

Application

Pictures: © SKF 2026

The mobile IND 320 is ready for use anywhere for rapid on-site maintenance, and is incredibly easy to use. A 5 kg bearing can be heated to 110 °C in under four minutes in only a few steps.
